## Project description

### Promoting research as a profession in Slovenia

One way to cultivate children's interest in science and to encourage young people to pursue science education is to promote the work of researchers. Highlighting the valuable impact of researchers' work in everyday life can help to engage and connect with young people. This is what the European Researchers' Nights are all about. With this in mind, the EU-funded ZATE project will bring researchers and their achievements to the general public, increasing awareness about research as a profession and inspiring youth to pursue scientific careers. The project will perform an intensive awareness campaign in five cities across Slovenia in cooperation with selected ERN consortiums through various pre-events and event activities and engagement of citizens.

## **Objective**

The key ZATE message is that everyone can become a researcher? and main project aims are to bring researchers to the general public, to inspire youngster to embark on science careers and increase awareness of: researchers' profession, the possibility of various careers in academic and non-academic institutions, understanding EU, the path to embark and develop research careers, researchers' important role in society and highly important impact of their work on our daily life. Inclusiveness is the key, not only when we speak about society, researchers (in all aspects) but also the young with less opportunity to get in touch with science (bus transport to ERN event). The intensive (off/online) awareness campaign (AC) will include national cooperation of selected ERN consortiums, various pre-events, national reward competition, Train the trainers and multipliers program. On traditional ERN main event renewed programs in a festive and fun atmosphere. Pre-events and events activities aim at offering the public at large an opportunity to get engaged in science through fascinating experiments, demonstrations, observations, to socialize and have fun with researchers in a relaxed atmosphere. They include various interactive activities of a wide range of science fields. ZATE activities will be implemented in Maribor, Krško, Koper, Izola and Nova Gorica. Trained researchers will interactively present research and innovation results. EU dimension will be visible, presented also by representatives of NCPs (MSCA, ERC), Europe Direct, SBRA Brussels. Traditional cooperation of the primary and secondary schools' winning teams of research and innovative projects in the frame of Youth for Maribor Progress (financed by Maribor municipality) is included again, as a way through which young easier inspire their fellows and connect with the real scientists. Last but not least, the improved impact assessment, which results are important contribution also to the evolution of the next ERN project activities.

### Project Information

**SAWE**

Grant agreement ID: 818968

Closed project

**Start date**

1 May 2018

**End date**

31 December 2019

**Funded under**

H2020-EU.1.3.5.

**Overall budget**

€ 157 819,75

**EU contribution**

€ 157 819,75

**Coordinated by**

UNIVERZA V MARIBORU

Slovenia

## Objective

Main objectives of Sawe project are to bring researchers to the public, increase awareness of researcher's profession, an important role in society and the impact of their work on our safe daily live with special attention to inspire the young to embark science careers. Sawe activities will bring closer to the public, especially to youngster, also the human, caring face of scientists with sense for humor and fun. For that purpose, we will implement awareness campaign with pre-events, "Stand-up Science" in 2018, 2019 and public-call for (pre)schoolchildren. On the last September, Fridays in 2018 (att. Cultural Heritage) and 2019 ERN will be organized with renewed programs in the festive and fun atmosphere. All Sawe events program activities aim at offering the public at large especially the young an opportunity to cooperate and socialize with researchers in a relaxed atmosphere. They include experiments, presentations, astronomy observations, workshops, researchers' rock bands performed by researchers and students. Rawe ERN events will take place in

Ljutomer, Maribor, Brežice, Koper, and Izola. Traditional cooperation of the primary and secondary schools' winning teams of research and innovative projects in the frame of Youth for Maribor Progress (financed by Maribor Municipality) enable most promising youngsters to inspire their fellows and connect with the real scientists. The »European corners« will be in the heart of every RN location: Marie Skłodowska-Curie fellows' witnesses, information how one can become a researcher, EC's various actions, programs, actions (incl. HRS4R, RESAVER) to present how EU cares about its researchers. Finally, yet importantly, the impact assessment includes pre-study and research prior and after events using a paper-pencil method. The impact assessment foresees intercultural comparison of results after using the same methodology as selected ERN leading partners: Prona-Montenegro, the Maastricht University and the University of Latvia.

## Fact Sheet

### Project Information

#### SciFe

Grant agreement ID: 722990

Closed project

#### Start date

1 April 2016

#### End date

30 November 2017

#### Funded under

H2020-EU.1.3.5.

#### Overall budget

€ 158 994,50

#### EU contribution

€ 158 994,50

#### Coordinated by

UNIVERZA V MARIBORU

Slovenia

## Objective

Main objectives of the SciFe proposal is to bring researchers to the general public, to inspire youngster to embark on scientific careers, to increase awareness of importance of research and innovation activities, with a view to supporting the public recognition of researchers creating an understanding of the impact of researchers' work on citizen's daily life. For that purpose the awareness campaign (AC) to convey messages under the slogan "Science for Life" will be used in 2016 and 2017. On Fridays 30.9.'16 and 29.9.'17 SciFe events will be organized with renewed programs in festive and fun atmosphere in Ljutomer, Maribor, Brežice, Ljubljana, Koper, Izola and Nova Gorica. All SciFe events' activities aim at offering the public at large an opportunity to cooperate in fascinating experiments, demonstrations, observations etc., to socialize and have fun with researchers in a relaxed atmosphere. The program is appropriate for public in general, regardless their scientific program and especially designed for youngest. SciFe programs' red line is contribution of science

to life in various aspects. The »European corner« will be prepared in the heart of every RN location: the visitors will be offered information on EC's various actions and programs, EU material, "the Charter and the Code", information how young people can become researchers and Framework Program witness's experiences. Intensive awareness campaign is designed according to its main target. The rich communication mix includes active engagement of the young people through the public call targeting primary and secondary schools. Last but not least, the impact assessment will focus to measure the success and the impact of SciFe activities. All that will be achieved through consortium management of all WPs and harmonised communication mix with general public which takes into account existing recognition of the RN event in certain region and its number of inhabitants.

## Objective

Main objective of our proposal is contributing to the reinforcement of public recognition of researcher as profession. The proposed events are organized on Friday 28.9.2012 in renewed program that consists of experiments, workshops, presentations from various science disciplines, researchers' rock bands, which red line is promoting importance of researchers as profession for society ...all with festive and fun character. The target audience of proposed events, foreseen in an informal and attractive way, in which whole families can take part in, is the public at large, from youngest one to elder citizens. Intensive awareness campaign, which embraces also each year's research of change in public perception after 28.9.2012 is important tool for strengthening of public recognition of researchers and to measure the impact of RN activities. All activities proposed aim at offering the public at large an opportunity to directly meet researchers in a relaxed atmosphere, with »European corner« in the heart of every event's location, information on EC care for researchers

and EU material and information how young people can become researchers, will be provided by European Commission's Europe Direct Maribor, Slovenian Research Agency and Ministry for Science and Technology. Visitors will participate in interesting experiments, workshops in cooperation with researchers. Also the secondary school pupils that will get highest scores at the regional competition of the research initiative "Youth for Advancement of Maribor" will cooperate as well. They will perform RN12 program, side by side with professional scientists with great opportunity to explore their possibilities of developing the real scientific, researchers' career with support of European Commission and national funders. Researchers will play on their own concert and keep company with visitors in late night hours of RN, their own Autumn Festival.

## Objective

"Main objective of our proposal is contributing to the reinforcement of public recognition of researcher as profession. The proposed events are organized on Friday 23.9.2011 in renewed program that consists of experiments, workshops, research of art in art gallery, researchers' rock band, different experiments, lectures... All with the sole purpose of promoting importance of researchers as profession for society and with festive and fun character. The target audience of proposed events, foreseen in an informal and attractive way, in which whole families can take part in, is the public at large, from youngest one to elder citizens. Intensive awareness campaign, which embraces each local and EU research of change in public perception after RN, is important tool for strengthening public recognition of researchers and to measure the impact of RN activities. All activities proposed aim at offering the public at large an opportunity to directly meet researchers in a relaxed atmosphere, with »European corner« in the heart of the event's location. Information

on EC care for researchers and EU material and information on how young people can become researchers will be provided by Euraxess and European Commission's Europe Direct Maribor. Visitors will participate in interesting experiments, workshops. Also the secondary school pupils that will get highest scores at the regional competition of the research initiative "Youth for Advancement of Maribor" will cooperate as well. The very young researchers and innovators will perform RN11 program, side by side with professional scientists with great opportunity to explore their possibilities of developing the real scientific, researchers' career with support of European Commission and national funders. In order to illustrate the fact that researchers are "normal people", whose unique specificity is their curiosity and passion for research, they will play the concert and keep company with visitors."

## Objective

Main objective of our proposal is contributing to the reinforcement of public recognition of researcher as profession . The proposed events are organized on 25 September 2009 : from experiments, workshops, humorous presentations, students' drama performance on research topic, two researchers' rock bands, different experiments which red line is promoting researchers' care for environment and importance of this profession for society and preservation of healthy natural environment...all with festive and fun character. The target audience of proposed events, foreseen in an informal and attractive way, in which whole families can take part in, is the public at large, including all different groups of population from youngest one to elder citizens. Intensive awareness campaign with research of public perception before and after 25 sept. 2009, will be important tool for strengthening of public recognition of researchers and to measure the impact of our activities. They all aim at offering the public at large an opportunity to directly meet researchers in a

relaxed atmosphere, with »European corner« and exhibition of posters' competition »Imagine the advertising poster of the 2010 researchers' Night« in the heart of the event's location. As a part of the »European corner« there will be a transmission of events organised in the frame of the European Researchers' night 2009 and available on internet connection. Interesting experiments, workshops in which visitors will participate will be performed. Information how young people can become researchers themselves and fun corner for the smallest children, will be available as well. In order to illustrate the fact that researchers are "normal people", whose unique specificity is their curiosity and passion for research, they will play on their own concert and keep company with visitors.

## Objective

"The main objective of our proposal is contributing to the reinforcement of public recognition of researchers, their important role in society and to present how European Union takes care for them. The common topic of all events in our proposal is Researcher as profession and European Union's care for them. The proposed events are organized on 28 September 2007: from artistic ones, researchers' rock band, experiments, to attractive discussion at round table about researcher as profession and women's position as researcher and their social role all with festive character. They all aim at offering the public at large an opportunity to directly meet researchers in a relaxed atmosphere. Researchers, representatives from Ministry of Higher Education, Science and Technology, will present Marie Curie Action, role of National Contact Person, The European Charter for Researchers, The Code of Conduct for the Recruitment of Researchers, ERA MORE. Interesting experiments, workshops in which visitors will participate will be performed. Information how young

people can become researchers themselves and fun corner for the smallest children, will be available as well. In order to illustrate the fact that researchers are "normal people", whose unique specificity is their curiosity and passion for research, which they are willing to share with any European citizen, we also give importance to women's role in society in connection with research and science and to researcher as profession. On this topic a round table will be organized at which the position of women researcher will be enlightened. The target audience of proposed events, foreseen in an informal and attractive way is the public at large, including all different groups of population from youngest one to elder citizens of respective age, and activities suitable for each of these groups. Drawing competition "Let's draw a researcher" will enrich location of the event with the exhibition of competitions' pictures."

### Objective

The main objective of our proposal is contributing to the reinforcement of public recognition of researchers and their important role in society. The common topic of all different kind events in our proposal is Researcher as profession. The proposed events are organised on 22 September 2006.

They aim at offering the public at large an opportunity to directly meet researchers in a relaxed atmosphere. Researchers, representatives from National Research Agency, economy and politics will present what researchers contribute to the economy and society in general and how young people can become researchers themselves.

In order to illustrate the fact that researchers are "normal people", whose unique

specificity is their curiosity and passion for research, which they are willing to share with any European citizen, we also give importance to women's role in society in connection with research and science. Therefore young women will meet also women who are successful researchers also from international point of view and at the same time they are also in important social roles for example as mothers, wives etc.

The target audience of proposed events, foreseen in an informal and attractive way is the public at large, including all different groups of population; children, students, professors, parents, and activities suitable for each of these groups, beginning with the only less informal event, the round table with European Commissioner for Science and Research, Mr. Janez Potocnik, who will talk about Lisbon Strategy where the importance of Researchers and their profession will be emphasized as well.

In continuation of the same day, we will organise several festive and sport activities, researchers??? show in which researchers will be presented from different point of views: interesting achievements, work and life where also women researchers will find special place. Main goal is to increase interest of young people to become researchers.
